

Dental services external to Perth Children's Hospital

PCH does not provide routine dental care for children.

The Emergency Department can offer a medical assessment for children requiring emergency treatment for dental and oral injuries, as well as relief of pain or infection. In some cases, a referral may be made to the PCH Dental Department. *Eligibility for treatment at PCH Dental Department is based on medical risk and is not automatic.*

The following services may assist with your child's routine dental care or current dental problem.
