Western Australian Coding Rule

1209/03   Carotid occlusion test

Q.

How should a Carotid occlusion test be coded?

A.

Documentation from a previous CAP Meeting indicates it was suggested (based on a Victorian Coding Committee decision) to assign:

35321-00 [767] *Transcatheter embolisation of blood vessel* (N.B this code has changed in 6th edition).

DECISION
Carotid Occlusion Test should be coded:
35321-03 [768] *Transcatheter embolisation of blood vessels, head and neck*

[Effective 28 Mar 2012, ICD-10-AM/ACHI/ACS 7th Ed.]

better health • better care • better value
