

Tell us if you are worried

If your child seems sicker or is behaving unusually, tell us right away.

Changes to look for:

Breathing is fast,
slow or noisy

More sleepy
than usual,
can't wake up

Confused, can't
keep eyes open

Pain that doesn't go
away, shivering or
shaking, crying a lot

Skin is cold, pale,
blue or patchy

Weak and
floppy

Hot or cold
to touch

New skin rash,
spots or marks

Talk to your nurse or doctor if you have questions or concerns.
You know your child best.

We will listen to you!
