

## DENTAL TREATMENT FOR CHILDREN

**Perth Children's Hospital does not provide routine dental care for children.**

The Emergency Department is able to offer a medical assessment for children requiring **emergency** treatment for dental and oral injuries, as well as relief of pain or infection. In some cases, a referral may be made to the PCH Dental Department. *Eligibility for treatment at PCH Dental Department is not automatic.*

**The following services may assist with your child's routine dental care or current dental problem:**
